Subject: Microsoft Settlement

I think it's past time for us to get this behind us.

We have reviewed the settlement and think that it would be in the best interest of all parties to settle this NOW!!!

Don't we have more important thing to do then to find unreasonable fault with one of our countries for thinkers?

You are always going to find a small minority that is out for their best interest, and not for the betterment of everyone. Microsoft has helped us little people get connected, and without their work for many people today wouldn't be on the internet. It's our choice who we use and Microsoft doesn't dictate as many people think.

Let's settle now!!!
